PERSONAL STATEMENT

Computer Science undergraduate with a growing focus on cyber security, possessing hands-on exposure to system analysis, vulnerability identification, and basic penetration testing concepts. Familiar with networking fundamentals, security principles, and tools used in practical environments through self-learning platforms and academic work.

EDUCATION

Bachelor of Engineering – Computer Science Engineering
Chitkara University, Baddi, Himachal
2023 – 2027
CGPA: 7.71

TECHNICAL SKILLS

SIEM & Monitoring: Splunk (log analysis, dashboard creation, alert investigation)

Network Analysis & Security Testing: Wireshark (packet inspection, network traffic analysis), Nmap (port scanning, service enumeration), Burp Suite (basic web vulnerability testing – XSS, SQLi), Nessus (vulnerability scanning, report analysis), Hydra (password attack simulations in lab environments)

Systems & Networking: Linux (Kali Linux), Windows, TCP/IP, OSI Model, Subnetting

Cloud Security: Amazon Web Services (AWS) – IAM, S3 security configuration, basic monitoring

Programming & Automation: Python (scripting, log parsing, task automation)

Security Frameworks & Compliance: Basic understanding of ISO 27001, NIST Framework, GDPR, HIPAA

ACADEMIC PROJECTS

SIEM Log Analysis & Threat Detection (Splunk)

- Analyzed security logs in Splunk to monitor real-time events and detect anomalies
- Developed SPL queries to identify brute-force and failed login attempts
- Created dashboards and alerts to flag suspicious activities
- Correlated logs to identify attack patterns and improve investigation efficiency

Web Application Security Testing (Burp Suite, OWASP Top 10)

- Performed security testing based on OWASP Top 10 vulnerabilities
- Intercepted and modified HTTP requests using Burp Suite
- Detected vulnerabilities including SQL Injection and Cross-Site Scripting (XSS)
- Recommended mitigation strategies to improve application security

Digital Forensics Investigation (Autopsy, FTK Imager)

- Acquired and analyzed disk images using FTK Imager
 - Investigated file systems and recovered deleted data using Autopsy
 - Identified suspicious files and user activity traces
 - Documented forensic findings while maintaining chain of custody
-

CERTIFICATES

- **Wipro** COE CRS Track – Microsoft Security, Compliance & Identity Fundamentals
- **Wipro** COE CRS Track – Azure Cloud Fundamentals
